

Hockley Agro UK - A Proud British History

Hockley Agro UK is a speciality company providing British farmers with high-quality, off-patent agricultural solutions. As an independent family business, we are enthusiastic about supporting and assisting UK farming to maximise crop yields with cost-effective products.

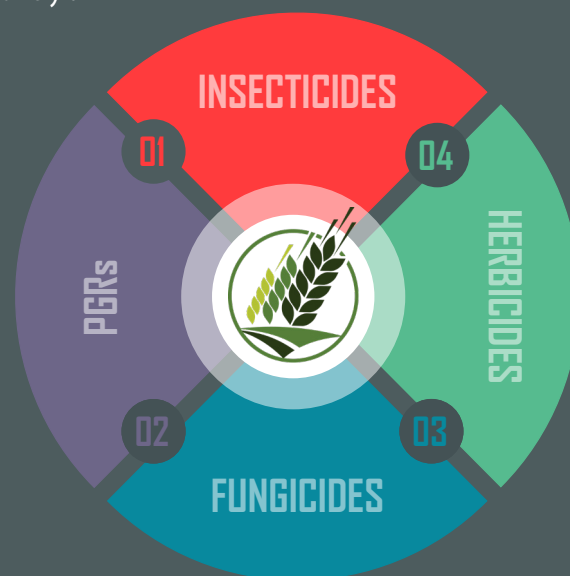

Our associated company, Hockley International, has a proud history of over 30 years' experience in the formulation, manufacture, and marketing of agricultural products around the world. With expanding opportunities in the UK market, the decision was taken in 2017 to form Hockley Agro UK to focus exclusively on the British market.

As a British company, we strive to ensure that our products are made in the UK. By partnering with British manufacturers we aim to help keep innovation, skills and craft thriving in Britain.

Manufactured in England

From our base in the north west of England, we produce the highest quality herbicides, fungicides and insecticides for pest, disease and weed control on farms.

Our mission is to produce a full generic range of registrations for British farmers and provide a greater choice of products to help increase productivity of British farms.

Our expert staff have an acute understanding of the manufacturing, distributing and marketing of agricultural products. It is our goal to ensure that our products are of the finest quality in formulation and packaging and that we are efficient and fair to do business with.

Our products which have been manufactured in the United Kingdom can be recognised by the signature logo on the label.

HERBICIDE

FLUDUAL

MAPP 18554

Fludual is a contact and residual herbicide for pre- and post-emergence use against a range of broad-leaved weeds and annual grasses in winter wheat and winter barley.

Active Ingredients:

400 g/l flufenacet

100 g/l diflufenican
